FARM WAGES CONTINUE AT RECORD LEVEL, WITH EMPLOYMENT UP

Farm wage rates in the United States on October 1 were at a record high for the date, although unchanged from July 1. Day rates without board averaged \$4.94 on the first of this month compared with \$4.39 a year ago and the 1935-39 average for October 1 of \$1.55. All types of wage rates were higher than a year ago, with the average increase amounting to 10 percent.

A total of 11,486,000 persons was working on farms on October 1, an increase of about the usual amount from September 1 and 4 percent more than were working a year earlier. Both family and hired workers showed about the same percentage increase over a year ago. More farm operators and unpaid members of their families were doing farm work October 1 than a month earlier, as is normal for the season. However, the number of hired workers declined from a month earlier. A decrease in hired workers also occurred during September last year, but in the 1935-44 period increases were usual from September 1 to October 1.

All types of wage rates on October 1 were higher than a year ago in all geographic regions and in most States. Increases were largest in the regions having the lowest wage rates, rises of 18 percent occurring in the South Atlantic States and 16 percent in the East South Central States. The smallest increases, 3 percent in the West North Central States and 4 percent in the Mountain and Pacific States, were in higher wage areas. In all regions except in the Northeast and the East North Central States present wage rates were over 3 times as high as October 1 rates in the 1935-39 period. In the Northeast and the East North Central States, wage rates were nearly 3 times the pre-war levels.

Wage rates on October 1 showed the usual wide spread between regions. Per day without board rates average \$8.51 in the Pacific States and \$3.29 in the East South Central States. Day rates without board were above \$6.00 in all regions except the South and the East North Central States.

The number of persons working on farms on October 1 was greater than a year ago in all regions except New England. The number of hired workers was considerably less than a year ago in this region, as the potato harvest in Maine was later than last year. However, the number of family workers was a little larger in 1946. The largest regional increase in total number of workers during September occurred in the Middle Atlantic States. Much of the

UNITED STATES DEPARTMENT OF AGRICULTURE
Bureau of Agricultural Economics

increase was due to a sharp rise in the number of hired workers, although the number of family workers also totaled considerably more. The number of workers was considerably larger than a year ago, largely because weather last year interfered with field work. The total of persons working on farms on October 1 ranged from 2 to 5 percent more than a year earlier in all regions. The number of family workers was larger on October 1 this year than a year ago in all regions except the Mountain and Pacific States, where the numbers were about the same as on October 1, 1945. The number of hired workers increased considerably, except in New England and the South. The East South Central States had a few more hired farm workers than a year ago, the South Atlantic States about the same number and the West South Central States a few less. This decline was probably due to the effects of heavy rains in eastern Texas.

In the New England States harvest of most 1946 crops was being completed on October 1. Apples were about one-half harvested but the harvest of the Arcoostock County potato crop in Maine was later than usual. Potato vines were still green in many cases and were delaying harvest. Earlier harvest of most crops and the later potato crop were largely responsible for a decrease from a year ago in the number of hired workers.

Weather conditions in the Middle Atlantic States this year on October 1 were much more favorable than a year ago. As a result, the number of hired workers was sharply higher than on October 1 last year, with about the usual seasonal decline from September 1. The number of family workers increased slightly, compared with the usual seasonal decrease, to remain larger than last year. Picking of apples and grapes was in progress in all States of the region. Corn was being cut for shocking in the field and for ensilage, with some being harvested for grain in New Jersey. Potato harvest was being completed in New Jersey and was under way on upland soils of New York. Dry beans in New York and buckwheat in New York and Pennsylvania were being harvested.

Declines from September 1 in the number of hired workers in the North Central States were greater than usual this year, but still considerably less than a year earlier. Last year on October 1 rain interfered with field work in all the East North Central area and in the southern part of the West North Central States. The number of hired workers this year was considerably larger than a year ago. The number of family workers on October 1 was also greater than last year, after a less than seasonal decrease. Fall seeding of winter grains was making good progress and harvest of late crops was starting in the entire region. Soybeans were being combined in Ohio, Indiana, Illinois and Iowa. Sugar beets in Ohio and Michigan were also being harvested. Potato harvest was under way in the northern States of the region. Some corn was being harvested for grain in Kansas and Missouri and broomcorn was being harvested in Kansas and Illinois.

In the South the peak load of harvest was at hand on October 1. Cotton picking was the major job in most of this section. In the South Atlantic States the number of persons employed increased a little more than usual during September. The number of family workers increased more than usual while hired workers showed a normal seasonal increase. More family workers were employed than a year earlier, but the number of hired workers was about the same. Other farm work in the region included preparation for and seeding

UNITED STATES DEPARTMENT OF AGRICULTURE
Bureau of Agricultural Economics

of ~~all~~ grains. Apple harvest in the Shenandoah Valley of Virginia and West Virginia and in Maryland and North Carolina also drew heavily on the labor supply.

In the East South Central States fall seeding of grains and cutting of late hays were major jobs on October 1 in addition to cotton picking. The numbers of both family and hired workers increased normally from September 1 to care for the increased load of work. Both groups of workers numbered more than a year earlier.

Rain in eastern Texas and western Louisiana was largely responsible for a smaller number of hired farm workers on October 1 than a year ago in the West South Central States. The number of hired hands increased seasonally from September 1, but less than half as much as usual. Family workers totaled more than a year ago, after a normal seasonal increase. Other farm work in progress on October 1 included rice harvest in Arkansas, Louisiana and Texas. The corn and peanut harvests were also of importance in Texas. In the High Plains of Texas wheat seeding was underway and grain sorghums nearly all harvested. Late hays were still being harvested in Arkansas and Louisiana.

Farm work had progress rapidly by October 1 in the Mountain States. The potato harvest was getting underway almost two weeks earlier than usual in the important potato sections of Idaho and in Utah and Colorado. Sugar beet harvest had started in Colorado and was about to start in Montana. Harvest of dry beans and other seed crops in Idaho were almost completed. Cotton picking had begun in New Mexico, a little earlier than usual, but labor requirements were low in the dry-land areas of the State because of drought conditions. Good progress had been made throughout the area in fall seeding of grains. Livestock hands were busy bringing stock down from summer pastures. The number of farm workers in the Mountain States was up slightly from this time last year but down considerably from the September level. The largest decrease was evident in the number of hired hands.

The number of both hired and family workers employed on farms declined seasonally in the Pacific Coast States during September. Wages, however, remained at a very high level and the supply of labor has generally been sufficient. Harvest of a bumper apple crop and the cranberry harvest were under way in Washington. While the prune harvest was nearing completion, in Oregon the apple, filbert and walnut crops were utilizing a large labor force. In California harvest of raisin grapes, prunes and almonds had reached their peak by mid-September but tomato picking and sugar beet harvest were nearing peak proportions on October 1. Harvests of beans, cotton and rice were well along.

SPECIFIC WAGE CEILINGS ISSUED, AMENDED OR REVOKED SEPTEMBER 1946 1/

FLORIDA

CITRUS FRUIT. Picking of grapefruit, oranges, and tangerines, loading of "bunch" or "goat" trucks in grape fruit, oranges and tangerine groves and driving "bunch" or "goat" trucks in grapefruit, or oranges, or tangerine groves in Florida. No. 21, amended August 12, 1946, issued Sept. 10, 1946.

Maximum wage rates: Picking tangerines, 30 cents per standard field box. Picking seedling oranges, 25 cents per standard field box. Picking oranges from canopy-type budded orange trees, requiring use of ladder 30 feet or more in length, 25 cents per standard field box. Picking budded oranges, 15 cents per standard field box. Picking grapefruit, 9 cents per standard field box. Provided, that in cases of sparse crops, where the trees are large enough to require the use of a ladder for picking and the entire grove or portions of the grove consisting of solid blocks of trees and covering 5 or more acres is less than 40 field boxes per acre, a wage rate not to exceed 75 cents per hour may be paid for picking tangerines, oranges, or grapefruit on such grove or portion of grove in place of the piece rates above, if the employer has advised the chairman of the Florida USDA Wage Board of his intention to use this alternative rate, before the beginning of picking, and shall have made proper showing to said chairman, that the foregoing conditions exist. Loading tangerines, oranges, and grapefruit loaders, including customary distribution and picking up of empty boxes, 70 cents per hour, or 1 cent per box stacking on "bunch" or "goat" trucks in grove, when fruit is stacked in boxes; $\frac{1}{2}$ cent per box for unloading from "bunch" or "goat" trucks at roadside to roadside truck; $\frac{1}{2}$ cent per box for stacking on roadside trucks when fruit is stacked in boxes, 2 cents per standard field box or equivalent measure or weight for loading in truck in bulk in grove. Driving "bunch" or "goat" trucks 70 cents per hour.

MISSISSIPPI

COTTON. Picking and pulling cotton in the Delta Area, the counties of Bolivar, Ceahoma, Humphreys, Issaquena, Leflore, Quitman, Sharkey, Sunflower, Tunica, Washington and the counties of Carroll, DeSoto, Grenada, Holmes, Panola, Tallahatchie, Tate, Warren and Yazoo except that wherever streams enter from the hills of the counties last named above, the "Delta Area" shall terminate at a line drawn from the base of the first such hill (counting from the Mississippi River) on the south to the base of the same hill on the north of such stream. No. 96, issued Sept. 6, 1946, effective Sept. 5, 1946.

Maximum wage rates: Picking cotton, \$2.60 per hundred pounds of seed cotton.

WASHINGTON

BLACKBERRIES. Picking Evergreen blackberries in Pierce County, except in the island and peninsula areas. No. 23, amended Sept. 10, 1946, effective Sept. 9, 1946.

Maximum wage rates: Picking Evergreen blackberries, piece rate, \$1.00 per 30-pound crate plus a bonus of 25 cents per crate if the worker continues to pick Evergreen blackberries throughout the season.

OREGON

HARVEST AND GENERAL FARM LABOR. Harvesting potatoes, hay, onions, wheat, barley, and other grains and general farm labor for all farming operations in Klamath County. No. 25, amended Sept. 19, 1946, effective Sept. 16, 1946.

Maximum wage rates: General farm labor, \$1.00 per hour when no housing or other perquisites are furnished, or \$200 per month plus housing and other perquisites exclusive of board. Harvesting all varieties of potatoes: picking potatoes, 5 cents per half sack of 60 pounds; all other potato harvest labor, \$1.25 per hour. Harvesting hay: Hay stackers, \$1.25 per hour; other hay harvest labor, \$1.00 per hour. Harvesting wheat, barley, and all other kinds of grains: header tender, \$8.00 per day and board; jigger and cartman \$9.00 per day and board; sack sewers, \$10.00 per day and board; truck drivers, \$10.00 per day and board; machine men (combine or separator operator) \$12.00 per day and board; caterpillar drivers, (single combine) \$9.00 per day and board; caterpillar drivers (2 or more combines) \$10.00 per day and board; bucking sacks, \$10.00 per day and board. When board not furnished to grain harvest labor rates may be increased \$1.00 per day. Harvesting onions; hand topping and sacking, 15 cents per 50 pound sack loading, bucking, swamping, \$1.25 per hour. The rate for all services not specified in connection with harvesting of grains and onions and for harvesting other crops except potatoes and hay shall be that specified for general farm labor.

POTATOES. Picking and other harvesting of potatoes in the counties of Crook and Deschutes. No. 28, amended Sept. 25, 1946, effective Sept. 23, 1946.

Maximum wage rates: Picking potatoes, 6½ cents per half sack of 60 pounds. All other potato harvest labor, \$1.00 per hour.

HOPS. Harvesting hops in the counties of Marion and Polk. No. 80, amended Sept. 5, 1946, effective Aug. 30, 1946.

Maximum wage rates: Picking hops, 4 cents per pound. No perquisites shall be paid in addition except the furnishing of cabins, tents, fuel, lights and water.

PLUMS AND PRUNES. Harvesting plums and prunes in Washington, Yamhill, Polk and Marion counties. No. 95, amended Sept. 12, 1946, effective Sept. 12, 1946.

Maximum wage rates: Picking plums or prunes or both from the ground, 25 cent per lug box of 56 pounds. Picking and shaking plums or prunes or both, 35 cents per lug box of 56 pounds. Other harvest labor, \$1.00 per hour. ("Other harvest labor" means all labor incident to the harvesting of plums and prunes, or both, except picking, packing and shaking, and prune dryermen and shall include, but not be limited to shakers, buckers, tractor drivers, truck drivers and loaders of sleds and trucks.)

CALIFORNIA

COTTON. Picking and snapping American upland seed cotton in the counties of Kern, Kings, Tulare, Fresno, Madera, and Merced. No. 36, amended Sept. 27, 1946, effective Sept. 13, 1946.

Maximum wage rates: Picking seed cotton: \$3.00 per 100 pounds: snapping,
\$1.50 per 100 pounds.
